

Quiz 3

1. (4pts) Write a function that returns the number of lines of code in a python file. A line of code is defined as any line that does not begin with a comment character or consists only of whitespace.

```
def locCount(filename) :
```

2. (4pts) Write a function that operates like `find ./ -printf '%fn'`, that recursively traverses the current directory and its subdirectories, printing the names of all the files in the directory tree.

```
def recurseDir() :
```
